

AIRBOT® TOOLS

The new B&J RFBOT AIRBOT® is the latest development in our line-up of buffing tools with incredible advantages:

**IMPROVED COOLING
ROUNDER BUFFING PROFILE
LONGER LIFETIME
FASTER GRINDING CYCLES**

The considerably rounder profile ensures a smoother buffing crater. The AIRBOT® series with its angled set-up works noticeably more efficiently and reduction of buffing time is proven. At the same time the AIRBOT® is cooled considerably better due to its open design, resulting in a longer lifetime. Tests have shown that the already established RFBOT design could be significantly improved with the new AIRBOT®.

RFBOT AIRBOT®
Ø 50 x 5 mm, AH 3/8", Ø 2" x 3/16"

RFBOT AIRBOT®
Ø 50 x 7 mm, AH 3/8", Ø 2" x 3/8"
